Subject: Superfund Health Risk Technical Support Center Supporting Region 5

Hi all:

You probably are already aware of this, but just in case...

FYI

Superfund Health Risk Technical Support Center Supporting Region 5

ORD's Superfund Health Risk Technical Support Center (STSC) is responding to a request from Region 5 for assistance in understanding the potential human health implications of per- and polyfluoroalkyl substances (PFAS) in surface water and foam in relation to sites where groundwater contaminated with PFAS is moving into surface water bodies and creating foam. The request is being coordinated with a request from Region 5 to the Superfund Engineering Technical Support Center (ETSC) for assistance in evaluating sampling methods and procedures for analyzing PFAS in foams and surface waters.

Regards,

Paul
